

Part 02

8) 80' x 90' killing zone for the two ballistae.

9) odd-shaped room with two ballistae. The ceiling broke up and dropped stones on them and the crews.

10) beds of the crews. Why are they in good shape ? Could they be an illusion ? And old campfire. Wood table debris.

11 through 16) Were the passageways there to confuse attackers ? Doesn't matter, all is dust and debris. Some pieces of metal that were once armor and weapons is all that is left. Oddly, no bones nor remains of those who once lived here.
